EIP marks Sweden launch with event in Stockholm

This Wednesday (March 15) we welcomed clients and contacts to the beautiful Opera Terrace (Operaterrassen) for an afternoon of topical sessions followed by drinks and canapés. The event marked six months since the opening of EIP's Stockholm office, our first office in the region. On a bright and clear day in Stockholm the venue offered stunning panoramic views across the water to sights such as the Royal Palace and Grand Hotel.

Guests enjoyed talks on topical subjects of generative AI, semiconductors, UPC, and IP sustainability. These sessions raised many questions from guests and provided lively discussion which continued into the evening. To read recent articles on semiconductors [click here](#), and to read more about UPC litigation visit [EIP Amar](#).

Head of EIP's Sweden office [Inga-Lill Andersson](#) comments: "It was lovely to be able to host this event and for myself and my colleagues to meet contacts in person. The sessions touched upon many hot topics and gave attendees an insight into the expertise at EIP."
